

Dear FCC Members,

I am writing to tell you my experience with a free and non-filtered internet. I learned the skills for my second career as a project manager due to non-filtered content. I was able to access content all over the world and I researched what I needed to know to make the decision to become a project manager.

I do not pay for cable TV because I do not want to pay the high prices to get various 'packages' of programming. The idea of Internet Service Providers having the power to dole out the internet in the same way that cable companies dole out television programming is a terrible one! Do not vote to FCC slow down, filter or censor the Internet by allowing ISPs to discriminate when they deliver content. The internet should remain open and non-filtered. A free and creative democracy requires access to content regardless of the ability to pay. LEAVE OUR INTERNET NET-NEUTRAL. Thank you.
